DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: "lugs 31are" in line 7 of paragraph [0039] should be written as:---lugs 31 are---.

Remarks

2. In view of amendments and indicated allowable subject matter in previous office action, the Examiner withdraws the objections to the specification and to claim 3. Therefore, all the claims are in a condition for allowance.

Allowable Subject Matter

3. Claims 1-7 are allowed.

4. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not show an insulator for an armature core of a rotating electrical machine as described in claim 1 wherein the tooth covering portions being formed with an axially extending flange to form an abutment against which a coil winding is abuttingly engaged, said insulator being formed with a slot like recess contiguous to said axially extending flange to trap the wire of the coil winding end to prevent it along the generally channel shape portion in a radial direction from slipping.
